Objective

To obtain full time employment in Software Engineering.

Education

B.S. Honors Biomedical Engineering
The University of Texas at Austin (UT), Class of May 2018
GPA: 3.64/4.00

Related Coursework

Operating Systems	Embedded Systems
Digital Signal Processing	Graphics & Visualization
Algorithms	Medical Device Design & Manufacturing
Software Design and Implementation 1& 2	Biomedical Device Design Lab

Work Experience

Software Engineering R&D Intern 05/17 – 08/17

- Wrote flash memory module in C for minimally invasive camera control unit (CCU)
- Designed workflows for CCU GUI specification
- Wrote functional test app in C to verify CCU PCBAs in production
- Root caused hysteresis issues with prototypes for a next generation camera feature, created basic solution, and laid out steps to make the feature production-ready

Software Engineering R&D Co-Op 01/16 – 08/16

- Made optimized and automated test which reduced iOS verification time by 2 ½ weeks
- Architected refactoring project, significantly improved encapsulation and abstraction
- Developed data mining tool in Java to craft configuration tables from .ipa files
- Established and implemented C# coding standards for software automation team
- Created onboarding program to efficiently train future Co-Ops and full time employees

Undergraduate Research Assistant 08/14 – 11/15

- Identified novel polymer crosslinking techniques for more efficient manufacturing
- Mitigated cancer drug resistance using self-assembled nanoparticles
- Created hydrogels to form stem cell based cardiac patches to treat myocardial infarction

BME Store Student Assistant 08/13 – Present

- Optimized email system and created new employee tutorial and troubleshooting guide
- Received Exemplary performance review two years in a row

Leadership Experience

Biomedical Engineering Society Vice President 05/15 – Present

- Responsible for maintaining corporate partnerships, hosting biotechnology career fair
- Doubled fundraiser profits and reduced costs to customers, netted 20% budget surplus

Accomplishments

BMES Robotic Design Competition, 1st Place
Nano Night Undergraduate Research Competition, 1st Place
Unrestricted Endowed Presidential Scholar
Engineering Honors Program Scholar

Skills

C/C++/C#	Xamarin	Data Acquisition	Wireless Power Transfer
Java	Android	Signal Processing	Soldering
MATLAB	Swift	Linux/Windows/MacOS	Arduino/Raspberry Pi
LabVIEW	UI Design	Automated Test	TCP/IP
